PREFACE

The Post Graduate & Research Department of Chemistry, Farook College (Autonomous) is very pleased to release the Proceedings of the International Conference on “ Emerging Frontiers in Chemical Sciences, EFCS-2017” conducted during September 23-25, 2017. This volume is an account of most of the contributions presented at the conference.

Chemistry, often referred to as the central science, is a unifying theme across disciplines. Nothing we come across in the physical world without atoms, molecules or other chemical entities. In that respect, chemistry is a branch of science that connects the world . Therefore, those who teach, learn and study chemistry are in fact rendering their valuable service to the global community. Interaction of scientists, academicians and students lead to new ideas which can transform the society. Seminars and discussions are organised to achieve this end.

This International Conference is the beginning of such an exercise in our college, with a view to bring together people engaged in the pursuit of science in this region. This event is very rich with the participation of eminent National and International scientists and with most respected Prof. C. N. R. Rao, FRS, as the inaugural speaker. Another attraction is the honouring ceremony of one of our most senior, faculty members of the department, with the lifetime achievement award for distinguished service to the discipline. This time we are honouring Prof. K. Shahid Latheef for his meritorious service.

We would like to thank all the participants for their contributions to the Conference and Proceedings. We would also like to place on record our appreciation and gratitude for the sponsors of the programme - SERB, KSCSTE, American Chemical society, Royal Society of Chemistry, the College Managing Committee, M/s Ambernath Organics Pvt Ltd, APCO- Hyundai group and others.

In this volume abstracts of invited lectures are given in the beginning followed by abstracts of posters/papers presented at the conference. The committee has tried its level best to make this collection a comprehensive one. The Proceedings provide a permanent record of what was presented. This presents a snapshot of the state of development of the subject at the time and will be invaluable for that reason.

We thank all those who have contributed to the successful organisation of the conference.
