About the College

Farook College established in 1948, has been serving the nation and the community for the last several decades. Farook College was the only First Grade College in Central Malabar at the time of its inception. Farook College (Autonomous) is today the biggest residential post graduate institution under the University of Calicut. The college has been re-accredited 'A+' Grade by the National Assessment and Accreditation Council (NAAC), Bangalore. The College offers instruction in various disciplines at the under graduate and postgraduate levels. Several departments in the college offer research programmes.

Post Graduate and Research Department of Chemistry

The post graduate and research department of chemistry is one of the most prestigious departments of Farook College. The department was established in the year 1957, with the under graduate programme. Today it also offers, masters and doctoral level programmes in a wide range of disciplines. The department has contributed great luminaries to the world of science. The department has been guiding the society towards knowledge and excellence.

Emerging Frontiers in Chemical Sciences (EFCS)

Department of Chemistry, Farook College has decided to organise a conference series named, "Emerging Frontiers in Chemical Sciences" or EFCS in short, for the benefit of scientists and technologists in the region. The conference would be an international event biannually, with a national event in-between.

The first national conference in this series, EFCS-2018 is scheduled to be held during 23-24 November 2018. The first international conference in the series, EFCS-2017 was held during 23-25 September 2017, and it was inaugurated by Prof. C. N. R. Rao.

EFCS is a high-quality venue for researchers in all branches of chemistry and allied sciences. The conference is intended to provide a platform for young researchers and science aspirants to communicate with international and national experts. This also aims to provide a link between the college and the outside world in the broader areas of chemical science. It will act as a forum to unite the chemical community in the region, spread across various institutions.
